

## Приложение №1

**Видоизмененный файл hosts**

```
# Copyright (c) 1993-2009 Microsoft Corp.
#
# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
#
# This file contains the mappings of IP addresses to host names. Each
# entry should be kept on an individual line. The IP address should
# be placed in the first column followed by the corresponding host
# name.
# The IP address and the host name should be separated by at least
# one
# space.
#
# Additionally, comments (such as these) may be inserted on
# individual
# lines or following the machine name denoted by a '#' symbol.
#
# For example:
#
#       102.54.94.97       rhino.acme.com           # source server
#       38.25.63.10      x.acme.com               # x client host
# localhost name resolution is handled within DNS itself.
#   127.0.0.1            localhost
#       ::1              localhost
